Troy, Michigan 48084

April 9, 2007

Dear Mr. Feord:

A handwritten signature in black ink, appearing to read "Doe", is written over the name "Mr. Feord".

I want to personally thank you and the Munro & Associates team involved with reviewing, assessing, and recommending product and process changes for the Stryker Mobile Gun System to improve the system's reliability. Your team's engineering expertise, sound analytical skills, process mapping tools, and communication skills were essential to establishing credibility and rapport with the government and industry team- Project Management Office, Stryker Brigade Combat Team and General Dynamics Land Systems, respectively. Your team completed a high quality review of a tremendous amount of product information in a relatively short period of time. The practical solutions offered during the out-briefing are a significant value to the project.

The key challenge for the Stryker Mobile Gun System was improving the ammunition handling system's reliability; your team helped us overcome that challenge. As I write this to you, the Stryker MGS is en-route for the first time to support Soldiers during Operation Iraqi Freedom. I wish you and your team continued successes in the future.

Sincerely,

A handwritten signature in black ink, reading "David J. Rohall", is written in a cursive style.

David J. Rohall
Lieutenant Colonel, U.S. Army
